

# Digital Signatures

Automatically create a digital signature for your records

## Business Goals

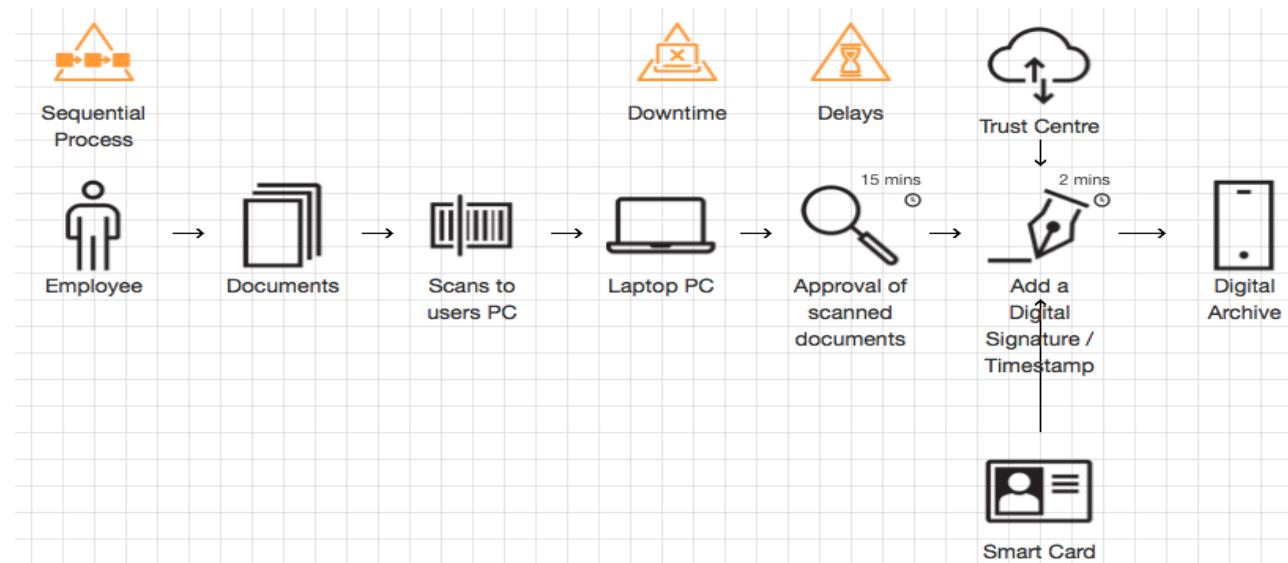

The benefits of an electronic signature are undisputed. The authorship and integrity of a document can be confirmed without any doubt thanks to the signature on the document and can be uniquely assigned to the author.

Turning documents through digitization with a digital signature is therefore a logical consequence in ensuring availability, authenticity, confidentiality and integrity.

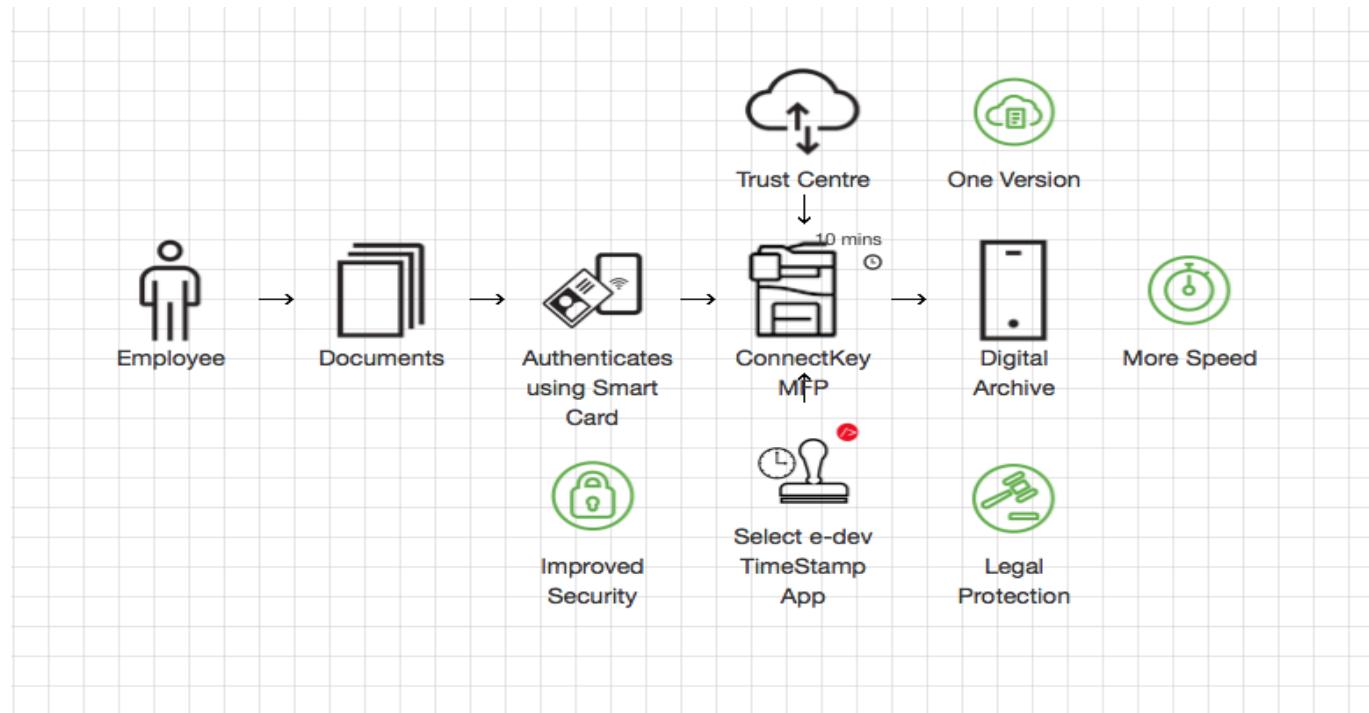

## Challenges

“Replacing scanning“ becomes more important. Paper-based documents are replaced by digital documents and the original papers can be destroyed. Although there has been “replacing scanning“ for several years, it creates uncertainty in many companies. The documents are often kept after scanning, since the companies are not sure whether the scanned documents actually meet the legal requirements for storage.

## BEFORE

## AFTER

## Financial Savings

Reducing costs with the **SignMe App** is very simple. The steps visual approval and manually signing are eliminated. 3 minutes per documents are saved.

	<b>Before</b>	<b>After</b>
<b>Documents to signature</b>	15 per day	15 per day
<b>Time for approval + signing</b>	3 min	0 min
<b>Minutes per day for signature process</b>	45 min	0 min
<b>Employee hourly wage</b>	\$25 / hour	\$25 / hour
<b>Employee cost signature process/ per day</b>	\$18.75 / day	\$0 / day
<b>Employee cost signature process/ per year</b>	\$4,687.50 / p.a.	\$0 / p.a.
<b>Financial Savings</b>		\$4,687.50 / p.a.
<b>Time savings</b>		187.5 hours / p.a.
